WELCOME

Dear Colleagues,

On behalf of the European federation of Critical Care Nursing associations (EfCCNa) and the Danish Society of Anaesthesia and Critical Care Nurses (FSAIO) we have great pleasure of welcoming you to the 4th EfCCNa & FSAIO Spring Congress.

This unique congress of two critical care nursing organizations indicates the strength of collaboration inspired by the EfCCNa motto: Working together – Achieving more. The purpose of this congress is to further celebrate and expand on the collaborations that already exist within Europe. More importantly the aim of the congress is to build new international networks, exchange ideas, experiences, and knowledge to advance our European critical care nursing profession.

The theme, **European Critical Care Nursing: Working together for a better tomorrow** aims to address the key issues for critical care nurses. The programme includes a variety of clinical, educational, and research topics that will have a wide appeal and will provoke the delegates in intellectual debate.

The International Scientific Committee is particularly pleased to announce that we received 211 abstracts of colleagues from 27 European countries, South Africa, Australia, Brazil, Singapore, and the USA. The programme covers a record of 28 scientific sessions with 135 oral presentations and over 70 posters. You will be spoiled for choice and intellectually stimulated by the presenters. On this basis, we hope that you find the scientific programme an enriching educational experience.

We hope you will have the opportunity to network and foster new links with colleagues.

Be inspired and enjoy wonderful Copenhagen!
